Webqanet is a leading web development and marketing company which runs on multi-channel basis in Kolkata serving clients in Australia, UK and many countries. We promise a comprehensive range of services, encompassing digital marketing as well as web development solutions, everything you need to stand tall in this cut-throat market. Our secret to success lies with our focus on best practices which mainly centre on creation of mobile friendly and highly responsive websites, mobile applications and different search engine friendly solutions. Webqanet hires experts who closely work together to transform a concept into a palpable outcome. Our workforce is committed to deliver tailored solutions, giving efforts in identifying client needs in order to secure a business position and to further help it grow. We seek credit in being recognised as an “exceptional” service provider that offers impressive results, churning from different ideas, conceptualisation and actions.Client’s Requirements Our professional project managers understands the individual client’s requirements and send them to the development team in the best possible manner. Planning & Strategy Our development team co-ordinates with the specific project manager and prepares the planning and different possible strategies to achieve your goals. Development Updates The project manager gets regular updates from the development team and keeps updating the clients at various stages making sure of the progress as per the client. Final Approval The final approval is asked for once we are done and send the project to the client for a review. If not approved, we work on it accordingly and get the final approval. Client’s Satisfaction Client satisfaction is very important for us. We make sure we deliver the results which are beyond expectations to our clients and get good reviews from them.
